

Hiring A Players and Avoiding the High Costs of a Bad Hire

The ability to attract and hire the right people for your team is a key leadership capacity and one that has a direct correlation to how well **you** are able to meet your professional goals and succeed as a leader. Unfortunately, few of us are trained in these very important skills.

Come learn how to hire people who fit in with your organizational culture and are high performing. This session will help you:

- Identify your "A" Players
- Learn strategies to recruit and retain "A" Players
- Learn how to deal with your "B, C and D" Players
- Identify who should be on your interview team

You are only as good as the team with whom you have entrusted your work. Make sure you are hiring the very best people possible.
